

Object

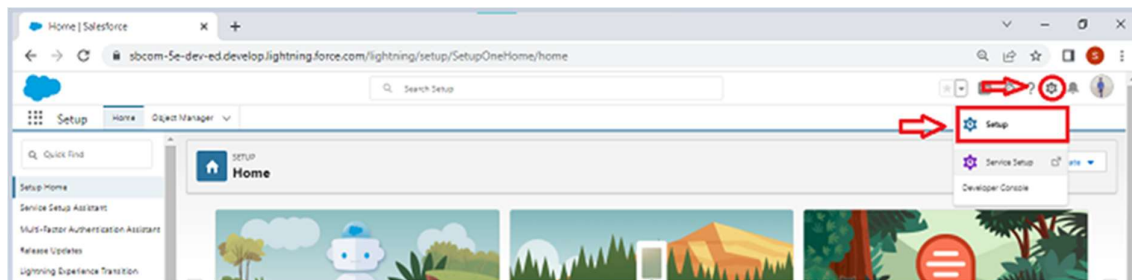

What Is an Object?

Salesforce objects are database tables that permit you to store data that is specific to an organization. What are the types of Salesforce objects

Salesforce objects are of two types:

1. **Standard Objects:** Standard objects are the kind of objects that are provided by salesforce.com such as users, contracts, reports, dashboards, etc.
2. **Custom Objects:** Custom objects are those objects that are created by users. They supply information that is unique and essential to their organization. They are the heart of any application and provide a structure for sharing data.

To Navigate to Setup page:
Click on gear icon ? click setup.

To create an object:

1. From the setup page ? Click on Object Manager ? Click on Create ? Click on Custom Object.

2. On Custom object defining page:

3. Enter the label name, plural label name, click on Allow reports, Allow search.

The screenshot shows the 'New Custom Object' setup page in Salesforce. The 'Custom Object Definition Edit' section is active. Under 'Custom Object Information', the 'Label' field is highlighted with a red box and an arrow pointing to it. The 'Plural Label' field is also highlighted with a red box and an arrow pointing to it. The 'API Name' field is highlighted with a red box and an arrow pointing to it. The 'Allow Reports' checkbox under 'Optional Features' is highlighted with a red circle and an arrow pointing to it.

The screenshot shows the 'Optional Features' section of the 'New Custom Object' setup page. The 'Allow Reports' checkbox is highlighted with a red circle and an arrow pointing to it. The 'Allow Search' checkbox is highlighted with a red circle and an arrow pointing to it. The 'Save' button is highlighted with a red box and an arrow pointing to it.

4. Click on Save.
